PROJECTS

My Games List - React/TypeScript/MongoDB/GraphQL/Express/Node

[Github](#) | [Live App](#)

- Finding new, fun and free games to play has become harder and harder to do due to the market becoming oversaturated with non-feature complete products.
- My Games List allows users to quickly search games by genre and save them to their profile to checkout at any time.

Store CMS - React/TypeScript/Zod/MUI/Sequelize/MySQL/Express/Node

[Github](#) | [Live App](#)

- Building and managing a small business is extremely stressful and time consuming. Store CMS is a content management system designed to help organize and alleviate some of the stresses of owning a small business.
- Store CMS allows owners to quickly and intuitively manage their customers, orders and products all in one place using a very simplistic and easy to understand design.

Amiibo Info - React/Tailwind/DaisyUI/Axios

[Github](#) | [Live App](#)

- Finding and learning about your favorite Amiibos has never been easier. Amiibo Info allows users to search characters by name and view all possible Amiibos available for that character and check out each of their release dates.

Crypto Follower - Next.JS/Tailwind/Firebase/Axios

[Github](#) | [Live App](#)

- Crypto Follower consolidates crypto coin information using the Coin Gecko API and allows users to view coin information and market analytics , browse through the top coins, and save coins to their profiles for quick reference.
