SUMMARY

Full Stack Developer with a strong foundation in software development and a passion for problem-solving. Experience building modern web applications using Javascript, and with stacks such as the **MERN stack**. I am also proficient in using **Git** for version control and **agile** methodologies for project management. In my past projects, I have demonstrated my ability to work effectively in a team and take on new challenges as they arise. I am eager to continue learning and growing as a developer, and I am excited to bring my skills and passion to any project or organization.

SKILLS

HTML/CSS/TYPESCRIPT/REACT/SEQUELIZE/MYSQL/MONGODB/GRAPHQL/NODE/EXPRESS/GIT

PROJECTS

MyGamesList - React/TypeScript/MongoDB/GraphQL/Express/Node

[Github](#) | [Live App](#)

- Finding new, fun and free games to play has become harder and harder to do. This full-stack application allows the user to search games by genre and save them to their profile to learn more about later.

Amiibo Info - React/Tailwind/DaisyUI/Axios

[Github](#) | [Live App](#)

- Finding and learning about your favorite Amiibos has never been easier. This application allows users to search characters by name and view all possible Amiibos available of that character as well as learning about each Amiibo's release date.

Crypto Follower - React/Tailwind/Firebase/Axios

[Github](#) | [Live App](#)

- Full-stack application consolidates crypto coin information using the Coin Gecko API and allows users to view coin information and market analytics, browse through the top coins, and save coins to their profiles for quick reference.
